

Recent Poll Results

According to a new poll, more than three-quarters of Americans (76%) believe that Al Qaeda's support base enables global terrorist organizations to continue their attacks against the United States. When informed how the support base empowers Al Qaeda and its allies, Americans are almost unanimous (94%) in believing that the support base for global terrorists must be destroyed.

"These results show that Americans recognize that undermining the support base is central to combating the threat of terrorist attacks against the U.S." according to Janice Bell, of Ipsos-Public Affairs, which conducted the survey employing the same methodology it uses for its Associated Press polls. "And a full 81% say it is very important—a view that is shared by people across generations, political views, and in all regions of the country."
